

WORD CONFUSION

✅ 1. Coding — (Only Writing Code)

Coding = Sirf code likhna.

Isme aap bas file khol kar JavaScript, HTML, CSS, React, Node.js, jo bhi language ho — likh rahe ho.

👉 *Coding is a small part of everything.*

Example:

- Button banaya
- Function likha
- API call likha

Coding ≠ Full website

Coding = Website ka ek part.

✅ 2. Website Development — (Complete Website Banana)

Website Development = Website ko beginning se end tak banana.

Isme coding ke alawa yeh sab hota hai:

- Planning
- Designing
- Coding
- Database (agar required)
- Testing
- Hosting
- Deployment

👉 *Website development = coding + planning + designing + setup.*

Example:

Aap ek real estate website poori bana rahe ho — Home, About, Contact, Admin panel, login, hosting.

✅ 3. Product Development — (Full System / Full Software Banana)

Yeh sabse bada word hai.

Product Development = Poore business system ko banana.

Sirf website nahi.

Sirf coding nahi.

Poora ecosystem banana.

Isme hota hai:

- Product Idea
- Market Research
- UX/UI Design
- Full Backend
- Full Frontend
- Database + Authentication
- Payment Gateway
- Admin Dashboard
- Launch
- Tracking
- Updates
- Customer Support

👉 *Micro SaaS = Product Development*

Example:

Aap ek appointment-booking SaaS bana rahe ho jisme:

- Doctor login
- Patient booking

- Payment
- Notifications
- Admin panel
- Analytics
- Subscription

Yeh Website Development se **bada** hai.

✅ 4. Build — (Software/Website ko Compile karke Optimized Version Banana)

Developer ke terms mein:

Build = Developer code → Production-ready output.

Jaise React mein:

npm run build

Iska meaning:

- Code optimize hota hai
- Files compress hoti hain
- Debug code remove hota hai
- Website fast ban jati hai
- Deployable folder "build" generate hota hai

👉 *Build = ready-to-host output.*

✅ 5. Build Website — (Poora Website Banana + Deploy Karna)

Build Website ka simple Matlab:

A to Z website ready karke live karna.

Steps:

1. Requirements lo
2. Design banao

3. Coding karo
4. Testing
5. npm run build
6. Hosting
7. DNS setup
8. Website live

SUPER SIMPLE SUMMARY

Ek line mein sab:

Term	Simple Meaning
Coding	Code likhna
Website Development	Puri website banana
Product Development	Business-level software/ system banana
Build	Optimized production output banana
Build Website	Website ko end-to-end ready karke live karna

 **Aapke dimaag mein ek clear picture:**

Coding

Website Development

Build

Build Website (Deploy)

Product Development (Big Complete System)
